

OXYGEN REQUEST FORM

Dear Customer,

In order for us to make oxygen (O₂) arrangements on United flights, this form must be completed and returned to our office as soon as possible to allow adequate time to arrange this service. We are unable to provide oxygen with less than 48 hours notice prior to travel. Once you complete the passenger information section, your doctor must complete the physician section and fax the form to United.

Please note the following important information:

- Oxygen service is **NOT** available on United Express® flights or during ground connections. Please contact an outside vendor for assistance if you require O₂ during ground connections.
- If your itinerary includes another airline, even as a code-share partner, please contact the operating carrier directly for their oxygen procedure or policy.

For additional information and assistance, please call United Reservations at 1-800-UNITED-1 (1-800-864-8331).

PASSENGER INFORMATION SECTION

Patient name (Please print)		Birth date (DD/MM/YYYY)		M / F (Circle one)
Telephone number		United reservation number		
Flight number	Travel date	Departure time	Departing city	Arriving city

TO BE COMPLETED BY PASSENGER'S PHYSICIAN

Dear Physician,

Your patient has indicated that oxygen is required to support his or her medical condition during travel. To enable us to make arrangements for your patient's in-flight O₂, please answer the questions below. After you have completed and signed this form, please fax it to **1-313-234-6966**. **Your signature authorizes United to administer oxygen at the flow rate indicated in your response.** If you need assistance, it is available at **1-800-UAL-MED1** (1-800-825-6331).

We appreciate your time and assistance with this process.

— United Airlines Medical Department

YES NO

1	<input type="checkbox"/>	<input type="checkbox"/>	The above patient's physical condition is stable enough for commercial flight(s). If yes, please note that United has the final authority to decline boarding at the time of departure if the passenger appears too ill to travel.
2	<input type="checkbox"/>	<input type="checkbox"/>	Patient requires O ₂ for flight. <i>If yes complete the following:</i> O ₂ is available in flow rate increments of 2, 3, 4, 5, 6, 7 or 8 liters. Half liters are not available. United is able to administer at a <i>continuous flow only</i> . Please indicate the flow rate: _____ liters per minute.
3	<input type="checkbox"/>	<input type="checkbox"/>	O ₂ is not available on Regional Aircraft operated by United Express. Can this passenger fly without O ₂ on United Express flights? Please keep in mind that the nature of travel sometimes involves delays that may affect the length of time that the patient will be without O ₂ .
4	<input type="checkbox"/>	<input type="checkbox"/>	Will an I.V. hook be required during flight?
5	<input type="checkbox"/>	<input type="checkbox"/>	Does this patient require a wheelchair for ambulation?
